

HttpKernel

```
classDiagram
    class HttpKernel
    class Kernel {
        # $middleware
        # $middlewareGroups
        # $middlewareAliases
    }
    HttpKernel --|> Kernel
```

The diagram illustrates a class hierarchy. At the top is a gray-shaded box representing the `HttpKernel` class, which is divided into three horizontal sections. Below it is a white box representing the `Kernel` class, divided into four horizontal sections. The top section of `Kernel` contains the class name. The second section contains three attributes, each preceded by a hash symbol: `$middleware`, `$middlewareGroups`, and `$middlewareAliases`. The third and fourth sections are empty. A blue arrow with a hollow triangular head points from the top of the `Kernel` box to the bottom of the `HttpKernel` box, indicating that `HttpKernel` inherits from `Kernel`.

Kernel

\$middleware

\$middlewareGroups

\$middlewareAliases
